DETAILED ACTION***Claim Rejections - 35 USC § 112***

Claims 1-4, 6, 8 and 13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation of "the sidewall portion extending parallel to the centerline..." is a new matter since the original specification disclosed as a **substantially parallel** (page 8, lines 4-5).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6, 8, 13-20 and 27-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Griser (US 6 539 910) in view of Hoffmann (US 5 605 126). Griser discloses a piston with an annular surface (14). A combustion bowl is defined by a circumferential sidewall and a bottom wall portion. The sidewall has a sharp edge at the intersection with the annular surface (14) and **substantially parallel** to the centerline. An upward flared portion is located between the sharp portion and the rounded portion (18). However, Griser does not show the use

Art Unit: 3747

of a solid head portion of a piston. Hoffmann shows that the provision of a solid piston head is old and well known in the art. Since the prior art references art from the same field of endeavor, the purpose disclosed by Hoffmann would have been recognized in the pertinent art of Griser. Therefore, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide the device of Griser with the solid head as taught by Hoffmann.

Response to Arguments

Applicant's arguments filed October 6, 2006 have been fully considered but they are not persuasive. The attorney argues that the Griser reference is not qualified because features that is not described in the text and is not represented clearly in the drawings. The examiner disagreed because the drawings in the references are qualified as prior art features even though unexplained by the specification. In re Mraz, 173 USPQ 25, In re Ming, 181 USPQ 94, 97. Accordingly, Griser clearly shows the provision of the sharp edges and wall that is substantially parallel to the centerline.

Conclusion

This is a RCE of applicant's earlier Application No. 10/603,528. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in

this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
